**“From the sea to a more sustainable world: BUGGYPOWER - Bronze Sponsor at AlgaEurope 2021”**

BUGGYPOWER has confirmed its sponsorship for AlgaEurope 2021 which will be held online from 7<sup>th</sup> to 10<sup>th</sup> December 2021.

BUGGYPOWER is a private biotech company dedicated to the design, construction and operation of microalgae production units. As microalgae life creators, BUGGYPOWERS' mission is to capture and fix CO<sub>2</sub> through the use of marine microalgae.

This is done in proprietary highly controlled closed photobioreactors allowing better control of growth parameters, preventing evaporation, reducing CO<sub>2</sub> losses, preventing contamination and allowing higher volumetric productivities. In the process, maximum quality marine microalgae are produced, using only sustainable raw materials: H<sub>2</sub>O, nutrients, sunlight and CO<sub>2</sub>.

BUGGYPOWER is producing three species of marine microalgae for a wide range of applications, from cosmetics to nutraceuticals, with a special focus on feed and functional foods. Several products are already being commercialized worldwide through BUGGYPOWERS' subsidiary company Bluevert Lab™.

BUGGYPOWER is today a reference for the model that EU is supporting as the way forward regarding Blue and Circular Economy, due to its sustainability, scalability and generation of high added-value products with significant impact on health and wellbeing.
