

AlgaEurope 2024 Conference Extends to Four Days, Introducing Industry Day

The highly anticipated AlgaEurope 2024 Conference is set to engage attendees with an expanded program spanning four days, including a newly introduced Industry Day. Following the resounding success of AlgaEurope 2023 and evaluating the results, the organizers have responded to feedback and industry insights, extending this year's conference to incorporate a fourth day, with a fresh approach. The conference is taking place in Athens, Greece from 10 - 13 December, with the now added day on Friday, 13 December.

AlgaEurope 2024 will maintain its important elements of conference sessions, poster presentations, and a dynamic trade show which will all take place at the Divani Caravel Hotel in Athens from 10 - 12 December 2024. However, the addition of Friday, 13 December 2024, marks a significant shift towards enhancing industry engagement. On this dedicated Industry Day, participants are invited to the National Centre For Scientific Research Demokritos, offering industry leaders a prime platform to present their work on stage. Moreover, attendees will have the invaluable opportunity for a site visit to Solmeya, situated within the Demokritos premises, facilitating firsthand exploration and interaction.

The decision to introduce the Industry Day underscores the organizers' commitment to providing enhanced exposure and opportunities for industry players. Recognizing the pivotal role of industry collaboration in driving innovation and progress within the algae sector, this dedicated day aims to catalyze partnerships, exchange expertise, and foster a culture of innovation.

Anticipating a gathering of over 450 participants, AlgaEurope 2024 aims to serve as a hub for collaboration, knowledge exchange, and innovation. Participants can expect engaging discussions on the latest advancements and breakthroughs in algae research and applications.

With its expanded agenda and unwavering dedication to advancing the algae biomass industry, AlgaEurope 2024 is poised to shape the future landscape of algae research and innovation. For more information please visit www.algaeurope.org.

About AlgaEurope:

AlgaEurope is the premier European conference dedicated to the advancement of algae biomass research and innovation. Organized by DLG Benelux and EABA (European Algae Biomass Association), the conference provides a platform for experts, researchers, and professionals to share knowledge, collaborate, and drive innovation in the field of algae biomass. AlgaEurope 2024 is expected to bring together more than 450 participants from around the world, making it a leading event in the industry.

About EABA

The objective of European Algae Biomass Association (EABA) is to promote mutual interchange and cooperation in the field of biomass production and use, including biofuel uses and all other utilisations. It aims at creating, developing, and maintaining solidarity and links between its members and at defending their interests at the European and international levels. Its main target is to act as a catalyst for fostering synergies among scientists, industrialists, and decision-makers in order to promote the development of research, technology, and industrial capacities in the field of Algae.
