

OFFSHORE

- We deliver, fast, safe and fit for purpose -

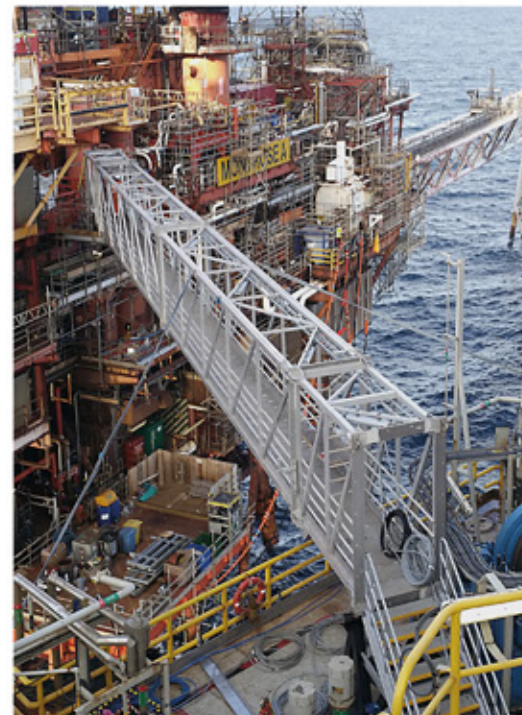

Creating **Safe** Connections

Solutions for today and tomorrow.

In a world constantly on the move, safety at the highest level isn't a luxury, but a necessity.

Bridges2000 contributes to that safety by building and supplying reliable bridges and gangway connections. Connections that ensure people's safe movement from one world to another during their work. So that at the end of the day (*shift*) they can safely return to that important world of home.

BO OFFSHORE GANGWAY

» FULL SERVICE:

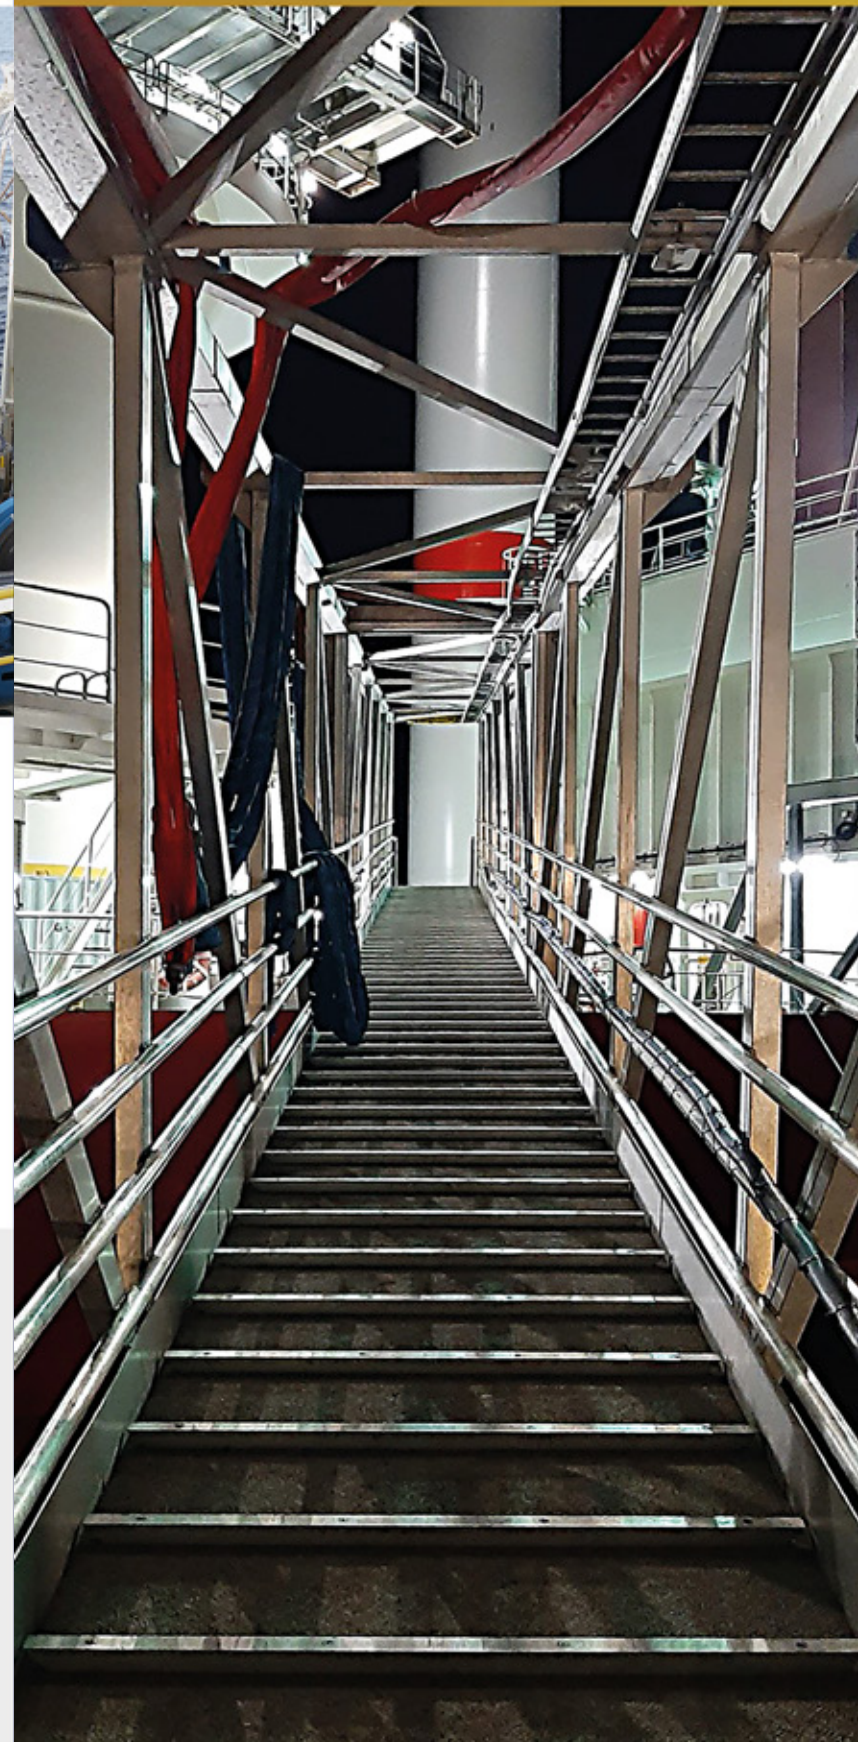

We do the engineering production and installation ourselves. This way the highest possible safety can be guaranteed.

» FAST DELIVERY:

Need a solution quickly? We might even deliver on the same day.

» IN-HOUSE PRODUCTION:

We produce fast, safe and always fit for purpose.

Welcome to **BRIDGES** 2000

We deliver, fast, safe and fit for purpose

On a daily basis, companies within the offshore industry are directly responsible for the lives and well-being of many workers, and indirectly for each of their loved ones. The smallest mistake can have the biggest consequences. That is why it is of great importance to be as prepared for the unexpected as possible. To adequately do this, we must minimize hazards and risks on the work site.

“Where connections are required, safety is of highest importance.”

– Hendrik van der Ham
Founder of Bridges2000

Bridges2000 knows the offshore sector very well and understands what is necessary. We create innovative and safe solutions that connect A to B and back. With this, we elevate safety to the highest level. Fast, safe and always fit for purpose. For any location, so people can always move safely from one world to another.

Safe and innovative solutions for the offshore industry

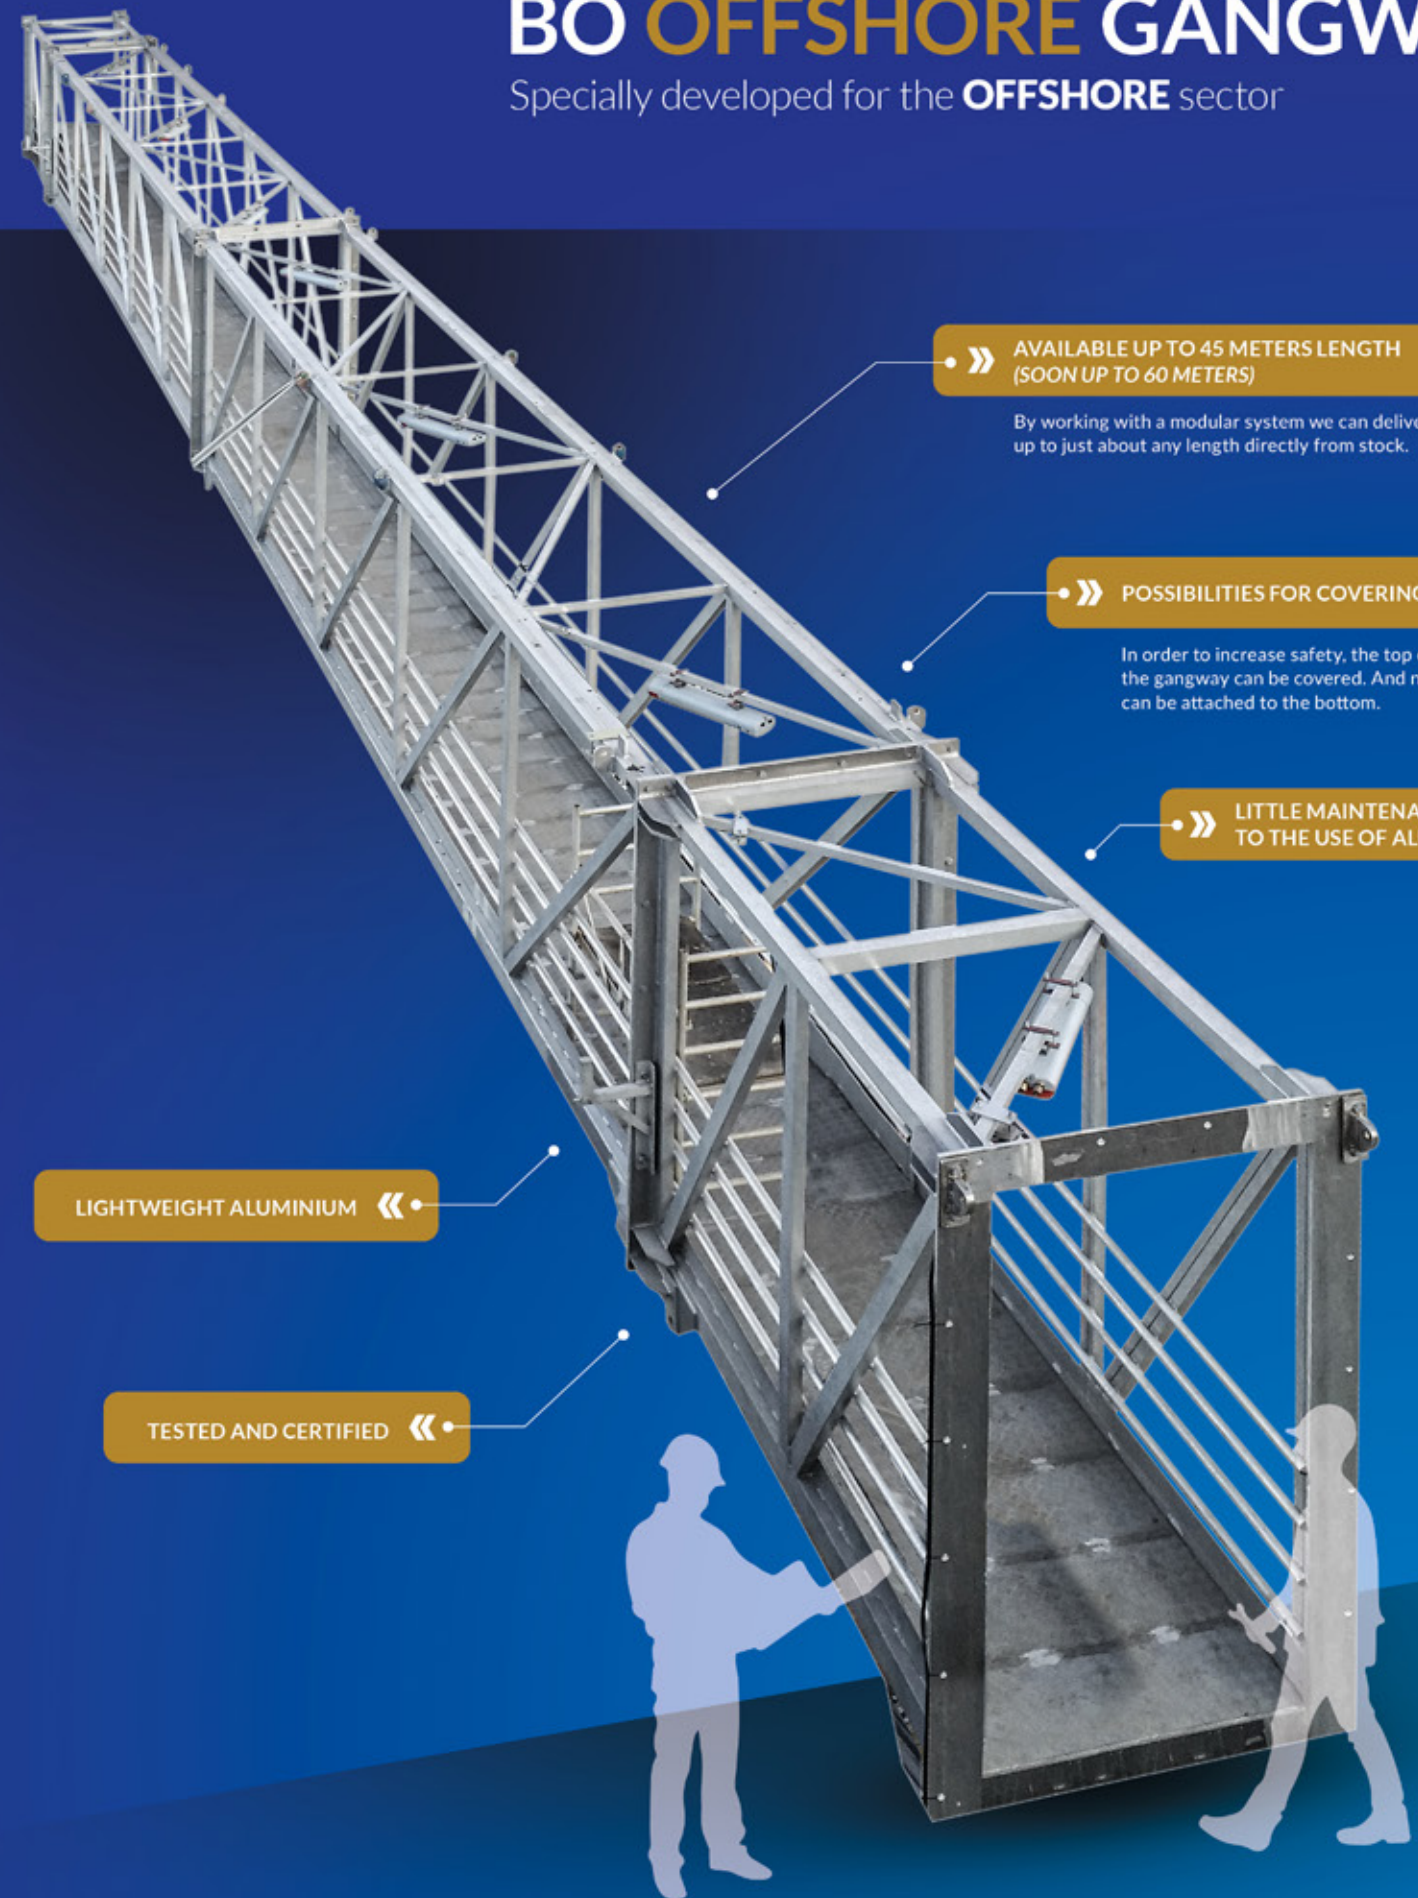

Bridges2000 builds and delivers every necessary connection as much as possible from stock or custom made. In this way, we offer the safest possible solution for every issue. And if desired, our connections can be tested and certified.

» BRIDGES AND GANGWAYS

Our bridges and gangways provide safe access to ships and pontoons, or a connection between jack-ups and drilling- and gas platforms. We always start from our customer's needs. If need be, we also supply fenders and pontoons as supplements to the bridge or gangway for your offshore project.

BO OFFSHORE GANGWAY

Specially developed for the **OFFSHORE** sector

» AVAILABLE UP TO 45 METERS LENGTH
(SOON UP TO 60 METERS)

By working with a modular system we can deliver up to just about any length directly from stock.

» POSSIBILITIES FOR COVERING

In order to increase safety, the top of the gangway can be covered. And nets can be attached to the bottom.

» LITTLE MAINTENANCE REQUIRED DUE TO THE USE OF ALUMINIUM ALLOY

LIGHTWEIGHT ALUMINIUM «

TESTED AND CERTIFIED «
