

# OIL TRANSFER SOLUTIONS

Leading companies worldwide trust OILSAFE for their oil transfer needs. Many go to great lengths to maintain the quality of their lubricants, yet contamination can easily occur through the use of unclean containers, dirty funnels, or by inadvertently mixing different oils.

With OILSAFE's oil transfer equipment, you can protect your lubricants from contamination, reduce machinery downtime, and minimize the risk of hazardous and costly spills. Choose OILSAFE for a reliable and efficient solution to oil transfer.

# Transfer Containers & Lids

Mix and match lids and drums to get the right lubricant transfer container for the job.
