ABOUT US

Luneta, LLC develops advanced machinery lubricant inspection technology for machine condition monitoring and reliability. Luneta's technology is designed primarily for the heavy machinery market (*OEM and aftermarket*) used largely in process plants including petrochemical, power generation, primary metals, food processing, mining, pulp and paper, pharmaceutical and cement manufacturing.

THE SIGHT GLASS

The Luneta Sight Glass is a 3D sight glass that provides a nearly 360° view of the oil thanks to the ultra-durable, crystal-clear and chemically resistant Tritan™ material.

This patent pending design is the perfect tool to assist with daily one minute inspections. The design features a flat front face for application of a pen light or camera for closer inspection and analysis. A built-in hex makes installation easy with a socket wrench or pliers. Two eyelets are provided for tagging useful information such as oil type and an oil color change card. And all of these features are packed into a single molded piece to eliminate leak points and improve reliability. Be sure to check out the impact test videos online to witness the true strength of Luneta's engineering and the Tritan™ material.

Available Male Thread Size:

NPT 1/4", 3/8", 1/2", 3/4", 1", 1 1/4" and 1-1/2" (2" NPT available end of 2022); **BSPP** 1/4", 3/8", 1/2", 3/4" and 1"

Metric 10x1, 10x1.5, 12x1.5, 16x1.5, 20x1.5, 22x1.5

THE CMP

The Condition Monitoring Pod® (CMP®) is a patented multiparameter inspection tool that modernizes and expands daily one-minute inspections. The CMP provides a nearly 360° view of the oil thanks to the ultra-durable, crystal-clear and chemically resistant Tritan™ material. The flat front face is designed for application of a pen light or camera for closer inspection and analysis. A visible corrosion indicator signals when the oil's chemistry has changed and begun to attack vulnerable metals. A visible magnetic plug is also provided to capture and display ferrous wear debris. Both the corrosion indicator and magnetic plug are removable for further inspection thanks to a rotatable sight glass. And lastly, if lab testing of the oil is required, the CMP has a built-in sampling valve with an attached pilot tube for live-zone sampling.

THE HUB

Now Available in STAINLESS STEEL

The Hub's patent-pending design turns one port into five. Eliminate the need to build elaborate assemblies of elbows, crosses and T's just because there is only one port on your machine. The Hub provides two lateral 1" NPT ports, two lateral 3/4" NPT ports, and one central 1/4" NPT port that is designed primarily for a sampling valve. The central port is shielded to protect the sampling valve from accidental impacts and debris. The lateral ports can be used to attach drain valves, quick connects, filter carts, bowls, columns and sight glasses. The Hub is adjustable every 45° so an optimal orientation can be achieved during installation. The Hub is best used in conjunction with Luneta's Column and Bowl. The Hub ships with a sampling valve, stainless steel pilot tube and four steel plugs to seal any unused ports.

THE COLUMN

The Column is a 3D sight glass designed for monitoring of fluids with greater fluctuations in level. The Column can be installed at the drain port or anywhere below the oil level. Included red and green level rings provide easy monitoring of the level between idle and running conditions. The level rings have a tamper-proof design to prevent accidental adjustments. The top of the Column includes either a 3-micron stainless breather or a vent tube kit for plumbing the air back to the headspace of the oil reservoir. The Column is made of the crystal-clear and chemically resistant Tritan™ material with 1" NPT threads for extra durability and also includes zinc-plated or stainless steel steel thread reducers. The Column works great with Luneta's Hub and Bowl. There is also a bypass tubing kit so the Column can be used in conjunction with a filter cart.

Vent Tube Option - Cooling Tower

3-Micron Breather Option - Speed Reducer

Available Male Thread Size: NPT 3/8", 1/2", 3/4" and 1"

Available Lengths: 3", 6", 9", 12", 15", 18", 24", 36", 48" and 60" (custom lengths are also available)

THE BOWL

The Bowl is a patent-pending 3D sight glass created specifically for the drain port.

The Bowl is designed to both condition monitor and to trap and purge bottom sediment and water. The rounded bottom and accompanying drain valve efficiently captures and purges both water and sediment that gravity pulls to the bottom. A built-in magnet captures and displays ferrous wear debris. A shield protects the outside of the valve from accumulating debris and impacts. Like other Luneta products, the Bowl provides a nearly 360° view of the oil thanks to the ultra-durable, crystal-clear and chemically resistant Tritan™ material. A built-in hex makes installation easy with a socket wrench or pliers. Two eyelets are provided for tagging useful information such as oil type and an oil color change card. And all of these features are packed into a single molded piece to eliminate leak points.

Air-Lock

Air-Lock protects oil drums against contaminant ingress during storage.

Temperature changes frequently cause breaches in drum seals allowing contaminated air (particles and moisture) to enter the drum headspace. Such contaminants during storage harm additive packages, increase oxidation, and leads to higher filtration costs. Air-Lock's patented design prevents contamination by increasing the headspace air pressure, which acts as a barrier against contaminants. Air-Lock also features a yellow fluorescent indicator to indicate a good seal, and that pressure is maintained. Stop contamination with confidence and get Air-Lock today.

Available Male Thread Size:
NPT 2" (typical drum bung thread size)

| THREADS | PART NUMBER |
|---------|-------------|
| 2" NPT | AIRLOCK |

SPECIFICATIONS

- **Application:** Oil Storage Drums
- **Threads:** 2" NPT
- **Dimensions:** (see graphic)

SEALED

ACCESSORIES

STEEL CORROSION INDICATORS

Detect abnormal corrosion and varnish conditions with these Steel Corrosion Indicators. They are designed to work with the Condition Monitoring Pod. The indicators are available as a three pack.

Specs: 1/8" NPT, unfinished steel with black handle, and Viton™ O-ring

[FE.INDICATOR.POD.K](#)

COPPER CORROSION INDICATORS

Assess the condition of internal surfaces made from bronze or brass with these Copper Corrosion Indicators. They are designed to work with the Condition Monitoring Pod. The indicators are available as a three pack.

Specs: 1/8" NPT, copper meets ASTM D130, and Viton™ O-ring

[CU.INDICATOR.POD.K](#)

MAGNETIC PLUGS

Collect ferrous wear particles with our Magnetic Plug. Designed to work with the Condition Monitoring Pod. The plugs are available as a three pack.

Specs: 1/8" NPT, stainless steel, strong neodymium rare earth magnets, 3/16" hex, and Viton™ O-ring

[MAGNET.POD.K](#)

CMP SIGHT GLASS REPLACEMENT KIT

The CMP's Sight Glass is made of the patented Tritan™ copolyester, one of the most impact and chemically resistant materials available. However should the impossible happen and the CMP's sight glass need to be replaced, this kit will do the job.

Included: Steel corrosion indicator, Magnetic plug, O-ring grease, Tritan™ sight glass with O-ring and installation instructions

[SG.100F2P.K](#), [SG.075F2P.K](#) or [SG.050F2P.K](#)

TUBE BENDER

Choose your exact pilot tube bend locations and the angles which best place the tip of the pilot tube within your machine for good sampling with our Tube Bender. It is designed to work with the Condition Monitoring Pod and Hub.

Specs: For 3/16", 1/4" or 5 mm diameter tubing

[TUBE.BENDER](#)

SILICONE CMP COVER

If your Condition Monitoring Pod is exposed to the elements, is in a high-dust environment or is in proximity to other extreme conditions, then keep it clean with our Silicone CMP Cover. It is designed to work with the Condition Monitoring Pod.

Specs: Red, chemical and impact resistant silicone rubber; operating temperature -55°C to +300°C

COVER.POD

HIGH FLOW SAMPLING PROBE

For attaching vacuum sampling pump to high flow sampling valve.

Specs: Sampling probe with barb for 0.23" inside diameter tubing; 6" length of LLDPE tubing included

PROBE.HIGH

STANDARD FLOW SAMPLING PROBE

For attaching vacuum sampling pump to standard flow sampling valve.

Specs: Sampling probe with barb for 0.17" inside diameter tubing; 6" length of LLDPE tubing included

PROBE.STD

HIGH FLOW OIL SAMPLING KIT

Draw representative oil samples with our Sampling Kit. The kit is designed to work with the Hub (*high flow sampling probe*).

Specs: Vacuum pump, 6' LDPE tubing, high flow sampling probe, 1 (16 oz) purge bottle, 4 (4 oz) sample bottles

SAMPLINGKIT.HIGH

STANDARD FLOW OIL SAMPLING KIT

Draw representative oil samples with our Sampling Kit. The kit is designed to work with the Condition Monitoring Pod and the Hub (*standard flow sampling probe*).

Specs: Vacuum pump, 6' LDPE tubing, standard flow sampling probe, 1 (16 oz) purge bottle, 4 (4 oz) sample bottles

SAMPLINGKIT.STD

ACCESSORIES

COLUMN VENT TUBE KIT

This kit is used to vent the air at the top of the Column back to the equipment's headspace, which creates a closed loop and takes advantage of any desiccant breather being used.

Included: Zinc plated and Stainless steel barbed fittings at each end, with 1" NPT female and 1/8" NPT male threads, and 6' length of 1/4" ID LLDPE tubing

[VENT.COLUMN](#)

COLUMN BYPASS TUBING KIT

This kit is used when the Column is installed on a Luneta Hub with a filter cart attached. The Bypass Kit will prevent the filter cart from drawing oil out of the Column.

Included: Zinc-plated and Stainless steel fitting, 1" NPT male threads, and a 6' length of 1/4" high temperature nylon tubing

[BYPASS.COLUMN](#)

COLUMN BREATHER

The 3-micron breather protects against airborne contaminants. It easily screws to the top of the Column, allowing air into the reservoir as needed.

Specs: Stainless steel sintered filter media, 3-micron

[BREATHER.COLUMN](#)

LEVEL RINGS

Two tamper-proof level rings mark the idle and running oil level. Each ring is made of durable nylon and secured in place with a socket cap stainless steel screw.

Included: Red and green nylon rings (1 each), stainless steel screws, includes hex key

[LEVEL.RINGS](#)

SILICONE COLUMN BREATHER COVER

If your Column Breather is exposed to the elements, is in a high-dust environment or is in proximity to other extreme conditions, then you might want to purchase the Silicone Column Cover!

Specs: Red, chemical and impact resistant silicone rubber; operating temperature -55°C to +300°C

[COVER.COLUMN](#)

Fill Port Splitter

Splits 1/2" NPT fill port into two independent ports for filling and breathing. Fill and breathe from the same port without contamination. For filling, a 1/2" NPT female fill port is provided. For breathing, a 1/2" and a 1/8" NPT female port are provided, both of which are independent from the filling port to prevent contamination. The 1/8" port can be used to attach the Vent Tube Kit from the Column.

[FILLPORT.SPLITTER](#)
