- Options: hose reel, anti static filters
- Identification OilSafe colours
- Super compact / integrated
- Connect and operate

Benefits

- Cleaner environments
- Less contamination
- Complies with Lubrication Reliability
- Improves Lubricant Quality
- Lower Lubrication Costs
- Lower Maintenance Costs
- Less Downtime
- Increases health, safety & productivity
- Stackable all-in-one system

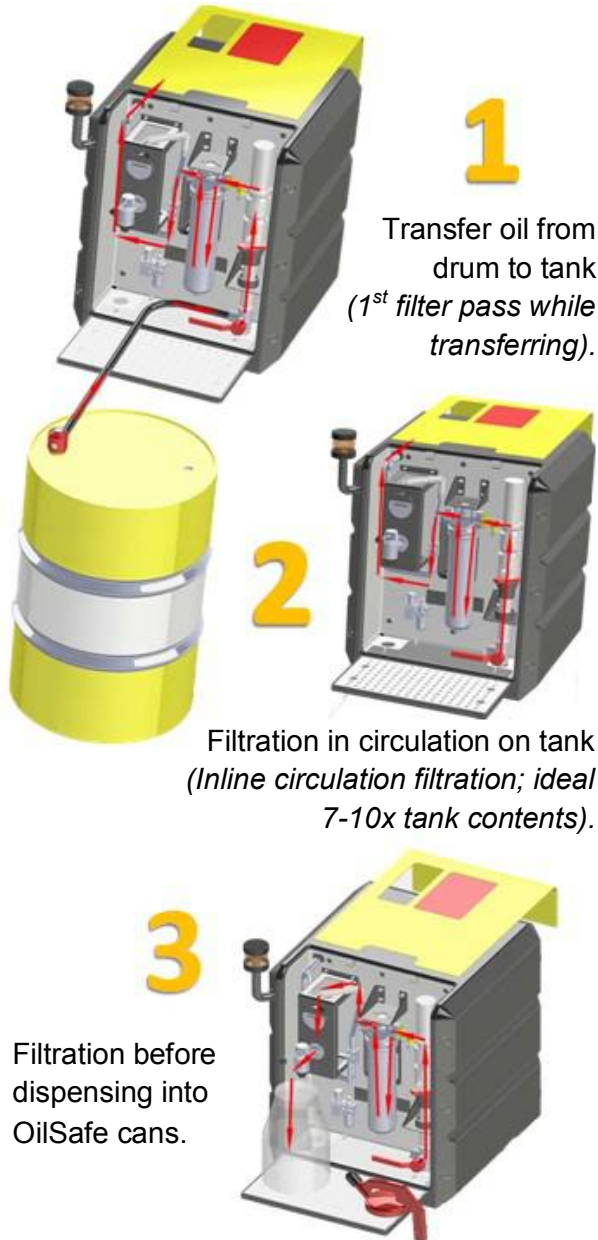

Customised Options

We can work with you to design a complete and custom built lube store, based on plant layout, lubricant usage and industry specific requirements.

Lubrication Reliability

Lustor System in Operation

Boost your LubeRoom with OilSafe

To minimise contamination ingress when storing and transferring lubricants in a plant environment, use only dedicated OilSafe drums; one set per lubricant. Label all equipment with the appropriate lubricant identification.
