

## Air Sentry Breathers

The GUARDIAN is the first breather ever constructed of Tritan, a patented material that is the most chemical-, temperature-, and impact-resistant combination casing on the market. The GUARDIAN takes check valve technology and cost-saving replacement measures to the next level.

Air Sentry® desiccant Breathers adsorb water from the air before it enters your fluid system and remove particle contaminants as small as 2 microns. The line is designed to meet your specific application and duration specification.

## Luster means Clean Oil

Luster (Lubrication Storage System). The bulk system that combines storage, filtration and breather technologies to keep lubricants clean and dry before they enter your equipment.

A safe, efficient and convenient method of storing and dispensing lubricants.

Available in three sizes: 125, 250 and 500 litre, and a wall mounted version.

## Oil Equipment

The transport container was the innovation that started it all. OilSafe dispensing containers have been tried and proven in the toughest work environments for more than a decade - easier, faster, safer.

With 5 different lid types designed to fit each of the 5 different drum sizes (1,5, 2, 3, 5, 10 l.) you can mix and match the components to build heavy duty durable containers.

The OilSafe Premium Transfer Pump offers advanced functionality. Including 5 ft anti-drip discharge hose, easy grip D-Handle, colour coding collar, increased efficiency, serviceable parts, and a wide range of optional accessories.

## Grease Equipment

Innovative, high quality OilSafe grease guns and accessories. Support 5S and Lean initiatives with the innovative identification features on all OilSafe guns.

Match the colour-coded Grease Gun to an OilSafe colour-coded Grease Fitting Protector to ensure the right grease is used in the right equipment.

The heavy duty pistol grip grease gun is ideal for one handed operation; included soft rubber handle grip for comfort.

## Identification

Customized and standard fluid identification from Bulk Storage to the Point of Use. Solutions range from simple adhesive labels through to solutions that include complete MSDS information. To eliminate cross contamination, match the drum label to the bulk label.

## Spill Control

Designed with efficiency in mind, keep your employees and work environment safe from unexpected drum spills or leaks. Spill Decks and Pallets: whether you are looking to comply with governmental regulations or just want the security of knowing your facility is protected, spill decks and pallets offer ample capacity.
