LUBRICATION RELIABILITY BEST PRACTICES

PRODUCT PORTFOLIO

info@enluse.com - www.enluse.com - +31 765781280 - UK: +44 7393429957

About Us

● **Founded in 2002.**

Promoting products and services to reach Best Practice in:

- Plant & Equipment Reliability
- Lubrication effectiveness and management
- Condition Monitoring effectiveness

● **Specialities:**

Lubricant Storage, Identification, Handling and Dispensing products, Desiccant Breathers, Visual Oil Analysis, Condition Monitoring, and Lubrication Management.

Main Brands

The Enluse portfolio includes leading brands offering the widest and most complete range of Lubrication Reliability products

The OilSafe lubrication management system establishes best practices throughout your facility. Every step is colour-coded to eliminate risk and human error, simplifying maintenance and extending the life of your equipment.

Contamination Control Breathers: The First Line of Defense

Air Sentry® Breathers should be an integral part of any proactive maintenance and reliability program. Designed to replace the breather cap or air filter on gear boxes, hydraulic fluid reservoirs, bulk storage tanks, oil drums, oil-filled transformers, and other fluid reservoirs

In 2015 we designed and developed a Best Practice storage system called LUSTOR™

Lustor™ is based on a set of plastic MDPE roto moulded tanks. Black inert plastic is chosen for its ability to protect the lubes from sunlight and because it does not rust or react with the chemicals in the lubricants.

The system is equipped with tanks of 3 different sizes:

- 125 litres (catering for 50-60-liter drum consumptions),
- 250 litres (because most plants order in 200 litre drums)
- 500 litres for larger consumption.

All individual units are equipped with the Lubrication Reliability™ compliant basic components.

LUNETTA

SMART PRODUCTS • RELIABLE MACHINES

Luneta: Smart Products - Reliable Machines

Lubricant Inspection and condition monitoring is giving you a better picture of your machine health.

Daily visual inspection is one of the most effective ways to ensure reliability.

LUBRISTATION®

The Lubrystation® family of solutions for storage, conditioning and distribution/dispensing of lubricants.

Custom made systems, assembled with modular components with functionalities in function of customers needs and requirements.

Visual lubricant inspection and monitoring equipment

Esco's visual oil inspection sight glasses are designed for easy installation on almost all lubricating machinery oil reservoirs in any industry.

Made of durable materials, the product line is built to withstand against most petroleum products and harsh environments.

FanPro™ Oil Analysis: The right test for your equipment

Along with the partnership with POLARIS Laboratories®, Enluse launched her own private label “FanPro™” – Fluid Analysis Program.

Effective oil testing is the best method to accurately determine maximum oil and filtration service intervals. Oil analysis can detect potential problems before catastrophic damage occurs. FanPro™ offers oil test kits and laboratory analysis.

ENLUSE

Enluse has Subsidiaries and Distribution Partners in Europe, Middle East and Africa. If you have any questions about our products, services or trainings, please contact us at:
