## ICLAS VETERINARY SCHOLARSHIP PROGRAM

### **The ICLAS Veterinary Scholarship Program announces a call for applicants, with a due date of August 1, 2023.**

For many veterinarians, the time and financial and personal cost of leaving employment and family to attend an established training program in a distant area is too big an obstacle to overcome. One option that can minimize these concerns is a program of modular, on-line classes combined with short periods of practical training in accredited programs.

There are several such programs in Europe and North America. These programs are recognized by groups such as **FELASA, CALAM, and ECLAM**, and provide official certificates of training, or an academic degree, upon completion.

The scholarship award is for 2/3 the total costs, up to maximum of €7,000. The student or his/her employer should fund the remaining 1/3 of the costs, paying for the initial training module, to demonstrate commitment to completing the program, as well as the ability to meet the academic and language requirements.

ICLAS thanks the generous sponsors for making this education opportunity a reality: **AAALAC, International, Charles River CHARTER Program, the Canadian Association for Laboratory Animal Science (CALAS), the American Association for Laboratory Animal Science (AALAS) and the American College of Laboratory Animal Medicine (ACLAM)**, ICLAS additionally provides a portion of the funding.

Additional information on candidate requirements, training programs and the application form are available [here](#).
