1. Objectives of Program

The objectives of the ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine were set out in the following proposal, which was approved by ICLAS GB in 2014.

Objective:

Training for veterinarians in the field of laboratory animal science and medicine is difficult to obtain in many regions of the world, particularly in areas with emerging economies where medical research is in developmental stages. For many veterinarians, the time and financial and personal cost of leaving employment and family to attend an established training program in a distant area presents too big an obstacle to overcome.

One option to minimize these concerns is a program of modular online classes combined with short visits to accredited training programs for experiential activities. There are several such programs in Europe and North America, and programs are being developed in other regions. These programs are recognized by groups such as FELASA, CALAM, and ECLAM, and provide official certificates of training or degrees upon completion. ICLAS seeks to make these programs accessible to veterinarians who live in areas without access to training, and who demonstrate a desire for this training but do not have the necessary funds for tuition and travel.
ICLAS Policies and Procedures: ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine

ICLAS has established a program to support veterinary training in laboratory animal science and medicine. ICLAS solicits applications from veterinarians seeking to participate in one of several specified training programs, listed at the end of this document. Other programs that meet the criteria may be added as they come to ICLAS’ attention.

ICLAS will offer to pay 2/3 of the total funds needed; the applicant and/or his or her employer will be required to provide 1/3 of the costs. ICLAS will provide funds to cover tuition, travel, housing, and per diem expenses for participants in the program, to a maximum of €6,000.

ICLAS will actively seek support from foundations and companies engaged in our field or in educational philanthropy. ICLAS will partner with likeminded associations such as IACLAM to seek funding. Money received will be kept in a fund managed by the ICLAS Treasurer and disbursed directly to the training programs for specific participants selected by ICLAS.

**Applicant qualifications:**

Veterinary degree. Desire to participate in laboratory animal science and medicine (employment in the field or some experience a plus). Statement of financial need. The applicant lives in an area in which training in laboratory animal science and medicine is not available. Statement of proficiency in the language in which the proposed course will be presented. Two letters of recommendation. A letter from the applicant’s employer agreeing to allow the applicant the necessary time to complete the coursework, including travel, within the program’s specified time period. In addition, a statement is required explaining how the applicant would make use of the training in his or her country, including sharing the knowledge with others. Finally, independent of ICLAS, each applicant will need to meet the qualifications of the specific training program to which he or she applies and be selected to participate by that program; a statement of acceptance from the program must be sent directly to ICLAS. Each candidate will agree in writing to complete the training within a specified time period, typically less than 3 years. (See current Application Form in Appendix 2 for current applicant qualifications)

**Selection process:**

Applications will be accepted once or twice per year depending on funds available, January 15 and June 15. Applications will be available on the ICLAS web page and sent on-line. A selection committee composed of representatives from ICLAS, IACLAM, and others designated by the Education Committee will evaluate the applicants according to a numerical rubric, with points based on stated need, language proficiency, recommendations, and statement of how the training would be used (see Appendix 3 for current score sheet for applicant evaluation). Applicants must have already applied to the desired training program, and let the program know that they are requesting financial aid from ICLAS in order to participate. Applicants will be informed of the outcome within 30 days of the application due date. (See Appendix 4 and Appendix 5)

**Publicity:**

ICLAS will advertise the program on its website (see appendix 1 for current entry on ICLAS website) and through its member associations and affiliates, and regional committees. Persons
ICLAS Policies and Procedures: ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine

receiving the scholarships and completing the program will be featured (with their permission) in newsletters.

**Programs:**

Programs that meet the criteria for inclusion provide postgraduate training for veterinarians, are affiliated with a formal institution of higher learning (university, veterinary college, training institute), have a modular education format available on-line, may be completed within a short time frame (1 to 3 years), require only a limited time spent physically at the institution offering the program or affiliated with the program to complete hands-on training, provide a certificate or degree upon completion, and are recognized within the laboratory animal science community by national associations. Program requirements are designed so that completion is achievable for students currently employed in a full-time job. Additional programs may be added by approval of the ICLAS Governing Board. *(See current Application Form in Appendix 2 for current approved programs)*

**2. Management of Program**

**Task 1:** Announce call for applicants on ICLAS webpage, allowing a minimum of 8 weeks and make the deadline to receive applications very clear. *See Appendix 1*

**Task 2:** Chair of Education Committee establishes committee to evaluate applicants (see Task 5). The committee should comprise a minimum of 3 people, i.e., a representative from the GB Education committee, from AAALAC and from IACLAM.

Dear XXXX,

I am inviting you to serve on the evaluation committee for the ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine on behalf of (name of organization). The evaluation process is based on a numerical rubric, with points based on stated need, language proficiency, recommendations, and statement of how the training will be used. Additional information about the scholarship program may be found on the ICLAS website at [https://iclas.org/iclas-scholarship-program-for-veterinarians/](https://iclas.org/iclas-scholarship-program-for-veterinarians/). Please let me know by XXX (enter date) if you are able to assist.

Thank you for your consideration.

Sincerely,

XXXX

Chair, ICLAS Education Committee

**Task 3:** Confirm receipt of application forms and inform applicants of any omissions or if any of the documents are out of date.
ICLAS Policies and Procedures: ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine

The applications must be supported by two letters of recommendation and confirmation of acceptance into the applicant’s chosen course. The application form and letters of recommendation must be dated after the date of the call.

If the application is in order, inform applicant that their application will be sent to the evaluation committee for consideration.

**Task 4:** Convert application form and supporting documents (i.e., two letters of recommendation and confirmation of acceptance into the applicant’s chosen course) to pdf format and combine to create an application package for each applicant.

The application package should contain only the application form, two letters of recommendation and confirmation of acceptance into the applicant’s chosen course. To avoid information overload for evaluators, do not include CVs, cover letters and certificates.

**Task 5:** The day after the deadline for applications, send application packages and score sheet for applicant evaluation (see Appendix 3) to each member of the evaluation committee asking them to return their evaluations by a specific date.

**Task 6:** On return of score sheets, sum scores to determine applicant with highest score.

**Task 7:** Confirm winner with Chair of Education committee and send letter to successful applicant as in Appendix 5, and to unsuccessful applicants as in Appendix 4.

**Task 8:** Chair of E&T Committee sends email to evaluation committee thanking them for participation and letting them know who received the scholarship.

Dear XXXX,

Thank you for serving as a member of the evaluation committee for the ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine. I am delighted to inform you that XXXX (name of applicant/s) from XXXX (name of country/ies) has/have been awarded the scholarship/s for XXXX (enter year). I deeply appreciate your time, effort and expertise in participating in the selection process.

Best regards,

XXXX

Chair, ICLAS Education Committee

**Task 9:** Send details of awardee to webpage administrator as in Appendix 6

**Task 10:** Update “Details of Awardees” as in Appendix 7.

**Task 11:** ICLAS Secretary General sends a letter on ICLAS letterhead by email to sponsors thanking them for their support and informing them of the awardee(s).

Date

Name
ICLAS Policies and Procedures: ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine

Title
Institution/Organization/Company
Address

Dear XXX,

XXXX (insert number of years since 2013) years ago, ICLAS launched a Scholarship Program to support the training of veterinarians in laboratory animal science and medicine. I am writing to thank you and the xxxx (name of institution/organization/company) for the generous $XXXX donation that will allow ICLAS to continue this program. To date X (enter number) veterinarians from Pakistan, Argentina, Brazil, Iran, Thailand, Chile, Sri Lanka, Argentina and XXXX (add additional countries as appropriate) have availed themselves of this opportunity to further their education.

I am delighted to inform you that XXXX (name/s of applicant/s) from XXXX (name/s of country/ies) has/have been awarded the scholarship/s for XXXX (enter year).

XXXX (enter name of institution/organization/company) joins AAALAC, International, Charles River Laboratories Charter Program, International, the Canadian Association for Laboratory Animal Science (CALAS), the American Association for Laboratory Animal Science (AALAS), the American College of Laboratory Animal Medicine (ACLAM) and XXXX (enter names of any new sponsors) in supporting this scholarship program. ICLAS has also provided some portion of the funding. As an ICLAS Scholarship sponsor, your XXXX (institution/organization/company’s) name will continue to appear as an ICLAS Scholarship sponsor on the ICLAS website with a link to your XXXX (institution/organization/company). (For a new sponsor, replace this sentence with the following: “As an ICLAS Scholarship sponsor, the name of your XXXX (institution/organization/company) will appear as a program sponsor on the ICLAS website, with a link to your XXXX (institution/organization/company”).)

Our hope is that veterinarians who are trained via this program will improve the quality of research animal care and use, contributing to improve animal welfare and quality science. On behalf of ICLAS, many thanks for your support.

Yours sincerely,

XXXX
ICLAS Secretary General

Task 12: If required by sponsors, complete awardee profile as in Appendix 8
Appendix 1: Current entry on ICLAS website for call for ICLAS Scholarship Program for Veterinarians (as of December, 2020).
ICLAS Policies and Procedures: ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine

See this link for details:

https://iclas.org/iclas-scholarship-program-for-veterinarians/
Appendix 2: Current Application Form

Dear Colleague,

Thank you for your interest in the ICLAS Scholarship Program for Veterinarians in Laboratory Animal Science and Medicine.

Please note that applications for an ICLAS scholarship will only be considered if they satisfy the following criteria:

**Qualifications:** applicants must have a recognised degree in Veterinary Science.

**Residence:** applicants must live in an area without access to training and also lack the necessary funds for tuition and travel.

**Scholarship:** this scholarship will provide up to two-thirds of the costs for a maximum of 6,000 Euros per applicant. The applicant and/or the applicant's employer must pay the remaining one-third of the expenses, including the initial training module, to demonstrate commitment to completing the program and the ability to meet the academic and language requirements.

**Costs:** the costs covered by the scholarship include tuition, as well as travel, housing and daily expenses while attending one of the designated schools.

**Payments:** the scholarship is paid directly to the administration of the training programs; no funds are given directly to students.

**Programs:** the applicant must have already applied to, and been accepted by one of the designated programs listed in the application form below. ICLAS will ask for confirmation that the applicant has been accepted into the program as stated on the application.

**Selection process:** applications can be made at any time but are due no later than 15 January of each year. Applicants will be informed of the outcome within 30 days of the deadline.

**Letters of recommendation:** applicants must send two letters of recommendation with their application. One of the letters must be from the applicant's employer recommending the applicant and agreeing to allow the applicant the time away from work to complete the coursework and/or attend the practical sessions including travel, within the program’s specified time period.

If you meet these criteria, please complete the application form below and return it together with two letters of recommendation to: laqnetwork@ICLAS.org
MEMBERS

Arvind Ingle (ACTREC, India)
Nobuhito Hayashimoto (CIEA, Japan)

If you would like more information about the ICLAS Scholarship Program or have any queries about your application, please do not hesitate to contact me at: laqnetwork@ICLAS.org

Yours sincerely,
Ekaterina Rivera
Secretary General

Appendix 4: Letter to unsuccessful candidates

Date
Dear XXXX,

Further to your application for an ICLAS Scholarship grant for Veterinarians in Laboratory Animal Science and Medicine, I regret to inform you that on this occasion we have been unable to award you a grant.

While the ICLAS Scholarship Committee was impressed by your application, as a result of limited resources we are unable to award grants to all applicants. However, please do not feel discouraged from applying in the next round, as we hope to encounter additional financial support for the scholarship program.

Yours sincerely,

XXXXXXX

Chair, ICLAS Education & Training Committee
Appendix 5: Letter to successful candidate

Date: xxxx

Dear XXXXX,

With reference to your application for an ICLAS Scholarship grant for Veterinarians in Laboratory Animal Science and Medicine, I am delighted to inform you that the ICLAS Scholarship Committee has approved a grant of €6,000 (six thousand Euros) toward the cost of your tuition for xxxxx (name of course).

The offer of this grant is subject to your agreement to the terms and conditions set out below. Please confirm your acceptance thereof by signing and dating the acceptance form below and returning this letter to me at info@iclas.org

Yours sincerely,

XXXXX
Chair, ICLAS Education & Training Committee

Terms and conditions for the provision of an ICLAS Scholarship grant for Veterinarians in Laboratory Animal Science and Medicine:

1. The grant is only to be used towards the costs of tuition, as well as travel, housing and daily expenses while attending (name of course)

2. The grant will be paid directly to the institution running the training program, and no money will be paid direct to the student.

3 No part of the grant will be released until the awardee has paid 1/3 of the cost of the program (either paid by the awardee or his/her employer).

4. The student must not agree to any expenditure without prior agreement of the coordinator of the training program.

5. Students must complete their training within 3 years of beginning the course of study.

Acceptance Form

I, xxxxx (name of candidate), agree to the above terms and conditions.

Dr Marina Snitcofsky,
Buenos Aires, Argentina

Full grant: €6,000

"I would like to express my deep gratitude to ICLAS and AAALAC for allowing me to do the Master in Science and Welfare of Laboratory Animals at the UAB in Barcelona. Without this economic help, it would be impossible for me, as I live in Argentina, to pay for the trips and the enrolment on this Master. This training is improving my knowledge of the field and generating important contacts with colleagues. It has also opened a new job opportunity for me in Argentina, as I have been able to obtain a new post as a consultant in welfare, health, management and experimental design in various public and private institutions. The course has also motivated me to speak at a number of academic events (conferences, workshops), which has filled me with pride and passion. Thanks again for giving me this opportunity and for helping Latin American professionals."

Veterinary Degree: obtained in 2005 from Veterinary School, Buenos Aires University.

Current job: consultant in welfare, health, management and experimental design in various public and private institutions

Sponsored LAS Training Program: Master of Laboratory Animal Science and Welfare, Autonomous University of Barcelona (UAB), Spain

Course start date: September 2014

Duration of course: 3 years with 6 compulsory attendance blocks, plus a 4 week placement in animal facilities and end of course project which includes an original research paper published in an indexed journal.

Progress as at October 2018: completed 5 of the 6 modules, plus 4 week placement. Currently completing research paper.

End of course date: April 2019, on completion of Genetics module. (completion delayed due to birth of son)

| Dr Mariana Abreu  
Rio de Janeiro, Brasil  
Full grant: €6,000 | "I’m really glad to say how important the ICLAS scholarship has been in my professional life. As a veterinary, researcher and a teacher in LAS at Federal University of Rio de Janeiro, I really wanted to enrol on the Master course in LAS at the UAB, which wouldn’t have been possible if I hadn’t received AAACLAS support to pay part of the cost of the course. I couldn’t wonder how much that experience would bring to me and for the development of the field in Brazil. Apart from learning important details to change some practices I have got to know a lot of really competent professionals in the area (teachers and other students), with whom I constantly discuss when unusual situations come up. In the light of my previous experience and what I have learned in the master, I am considering applying for the ECLAM alternative route to take their exam and become a Diplomate." | Veterinary Degree: obtained in 2005 from Federal Fluminese University, Brazil.  
Current job: Full time teacher at the UFRJ teaching Laboratory Animal Science courses to undergraduate and graduate students.  
Sponsored LAS Training Program: Master of Laboratory Animal Science and Welfare, Autonomous University of Barcelona (UAB), Spain | Course start date: November 2016  
Duration of course: 3 years with 6 compulsory attendance blocks, plus a 4 week placement in animal facilities and end of course project which includes an original research paper published in an indexed journal.  
Progress as at October 2018: Completed 5 of the 6 modules and will complete final module in February, 2019  
End of course date: Expects to finish in May 2019, 2-3- months after final module. |
