

A Message to the people on the EAA continent

(Europe, Asia and Africa)

We are not Europe, Asia, and Africa. **We are one single landmass**, one shared continent: EAA.

By the way we name ourselves shapes how we see ourselves, and how easily we can be divided. Fragmented in identity, we lose sight of the whole. And while we fight each other, **we allow others to take what is ours.**

Through the power of image and narrative, we have come to accept a new form of slavery, not with chains, but with contracts, currencies, tariffs and confusion. We allow the United States to extract our natural resources, dominate our energy markets, and sell us weapons, to use **against each other.**

We are in a civil war on our own continent. And we are paying for it. We pay the U.S. for overpriced gas and weapons. We invest not in peace or innovation, but in fear, division, and destruction. **We fund our own downfall** while living in constant tension.

There have been leaders who fell as a result of U.S. interference. What followed these interventions was often chaos, instability, and suffering. **This must stop!** It's time to reclaim our perspective, and our power. Time to see EAA not as a battleground, but as a birthplace of cooperation, creation, and peace.

I humbly extend my hand in friendship and request an invitation to come together in **dialogue**, to discuss a lasting and just peace strategy for the EAA continent. Together, let us envision and build a future where our shared history is one of unity, strength, and beauty.

Let us open the door for others, Australia, Canada, and South America among them, to join this noble journey. In this way, we can forge a new world order **grounded in cooperation and respect.**

We are one. The United States is two.
Together, we shall rise.

In unity and determination,

Youri Hazeleger
