**Subject:** Strategic Partnership Proposal on Steel Industry and Health Innovation

**Dear President Trump,**

First off, I want to say—nobody commands attention and shakes up the world stage like you. Your straight talk and drive have energized millions and changed the game in politics and business. Whether you agree or not, **your impact is huge and lasting**. Thank you for being a true leader who's never afraid to challenge the status quo.

Now, let me get right to it. We've got a tremendous business opportunity. We want to move about **\$5 billion worth of Tata Steel operations to the US**. Instead of sending money overseas for steel used in war products, we'll buy your American steel directly. This move? It's a total win-win. It boosts your position as the world's steel powerhouse and fires up economic growth for both sides. Right now, the Netherlands spends about €1.5 to €2.5 billion every year on weapons and military gear from the US, including steel products. Imagine capturing that market with homegrown steel.

But that's not all. We're investing big in data—**Microsoft Power BI and ChatGPT**—to track long-term effects of mRNA tech in animals and humans. We're experts in medical psychedelics—the same kind that Steve Jobs, Bill Gates, and Elon Musk turned to. These aren't just buzzwords. Psychedelics can heal neurological diseases and mental health issues, building healthier, stronger people. Robert F. Kennedy Jr., the U.S. Secretary of Health and Human Services, supports advancing psychedelics for medical use. In the Netherlands, under **Article 5, paragraph 2 of the Opium Act**, the Minister of Health can designate persons or institutions for legal exemptions, making psilocybin completely legal for adults 18 and over—similar to alcohol regulations.

In Food Valley, we are committed to promoting organic farming and rejecting discriminatory price-raising practices against organic products. This supports a mentally healthy and strong society—goals that align closely with **Secretary Kennedy's vision for improving public health** through better nutrition and sustainable food systems.

Investing in human capital and data means creating a healthier society—and that means a stronger economy. Just like in sports: build your body, sharpen your mind, dominate the field. **Psychedelics can help us create a population with rock-solid cognitive and emotional strength to be #1 in the world.** What's up with China?

We want to connect all the government healthcare agencies with Power BI to monitor and optimize care, building a strong, resilient society. And use ChatGPT add-ons to train healthcare workers better and faster. The Netherlands is small, but **we can be your best partner.**

My name is Youri Hazeleger from Joet, based in Ede, **the heart of Food Valley**. We focus on people's health alongside the World Food Centre. If you want to be our defense department, we'll be your health department.

Let's make it happen.

Best regards,

**Youri Hazeleger**
