The
System
that keeps
your oil
clean

The Wall Mounted System

Wall Mounted (WM) Standard Lustor Unit

Achieve best practice in Lubrication management with Lustor, the high quality Wall Mounted Unit. A colour coded system, fully sealed, that ensures clean, safe, onsite dispensing. The system has the same great oil management features as the 125, and 250 liter units, except it draws the lubricant directly out of the suppliers barrels. System dimension: (W) 700 mm x (H) 800 mm. Affixed to the wall these units are a stable/safe oil management solution.

Features

- Dedicated 3:1 ratio Pneumatic Pump
- 3 or 10 micron filtration (3 way)
- Filtering while loading the system
- Filter cartridges selected for resp. lube type, viscosity and application
- Quality filtration
- Ability to kidney loop the drum
- Air supply integrated
- Self closing, anti drip tap included
- Consumption meter

Connect and Operate

Features

- Colour coded identification.
- Decanting from 20/60/200 litre drums into OilSafe fluid transfer containers or similar.
- Able to be installed into any Lube Room.
- Super compact 1 Lustor System per lubricant.
- Option to make the Lustor System PLC controllable.
- The Lustor System conforms to EU Machine Directory 2006/EC EN ISO 12100:2010 and is CE marked and compliant.

Decanting of filtered oil from drums unto OilSafe transfer containers are similar.
