

OilSafe

Breather Adapter Kits

Extending fluid life saves money and downtime

Domed Flange Adapter Kit

Domed Flange Adapters provide a low profile yet rugged way to mount a 1" NPT desiccant breather to a hydraulic reservoir. Includes 6-hole ANSI pattern gasket and fasteners for perfect replacement of bayonet flange and vent cap. The beveled surface directs spills and contaminants away from the opening.

(Available in a dark gray colour.)

Height : 0.75 inch (1.9 cm)

Diameter : 3.5 inch (8.89 cm)

Mounting

Connection : ANSI 6-hole pattern flange

Part # : A114DG

Brand : OilSafe

Drum Adapter Kits

Drum Adapter Kits allow breathers to be installed on any storage tank or drum; there's never been a cleaner, more effective way to store, filter and pump lubricants from a drum. Unique design ensures all fluid handling is managed through one adapter. Anodized aluminum adapters have colourized quick connects for pumping oil in and out of drum. Single-port access to the oil reduces contamination as drum remains closed. Off-line filtration units easily connect to adapter without ever disrupting the performance of the breather.

Drum Adapter Kits are available in a dark gray colour and configured with:

- no Quick Connects,
- ISO-B Quick Connects or
- Colourized Quick Connects available in 10 familiar OilSafe colours or silver.

Height: 4.75 inch (12.065 cm)
Diameter: 2.5 inch (6.35 cm)
Mounting
Connection: 2" MNPT
Brand: OilSafe

Gearbox Adapter Kit

Gearbox Adapter Kits allow breathers to be installed on any gearbox. Oil can be pumped in or out without opening the gearbox to atmosphere. Offline filtration, oil changes and sampling can be handled through the adapter. They are a faster, simpler and cleaner way to handle gear oils and reduce ingress.

Gearbox Adapter Kits are available in a dark gray colour and configured with:

- no Quick Connects,
- ISO-B Quick Connects or
- Colourized Quick Connects* available in 10 familiar OilSafe colours or silver.

Hydraulic Reservoir Adapter Kit

Hydraulic Reservoir Adapter Kits allow breathers to be installed on any hydraulic fluid tank or reservoir. The patent-pending aluminum adapters have colourized quick connects in two sizes for pumping oil in and out, allowing the system to remain closed at all times, dramatically reducing contamination while improving oil-handling safety. Off-line filtration can also be connected through the adapter without ever disrupting the breather or opening the tank.

Hydraulic Reservoir Adapter Kits are available in a dark gray colour and configured with:

- no Quick Connects,
- ISO-B Quick Connects or
- Colourized Quick Connects* available in 10 familiar OilSafe colours or silver.

Colour-coded quick connects

Simplicity, Flexibility, Reliability

The colour-coded, strong, anodized aluminum flat-face quick connectors are easy to use and almost impossible to cross-connect. Purity across your distribution processes and lube storage are thereby guaranteed. The quick connect integrate with a wide range of lubrication management systems and equipment.

Each colour coded, keyed, female colour connector only fits its male matching color.

The **silver Quick Connect** is available as a **universal fit** (not keyed) for all 10 colours.

OilSafe's Quick Connects keep your machinery and fluids lasting longer while maintaining a safe and efficient work environment. These zero-leak quick connects eliminate wastes and spills throughout your facility.
