

Lubristation M - Mobile

Storage & Conditioning & Distribution of lubricants

Mobile version :

The Lubristation M mobile version is a mobile drum pump and filter system equipped with an oil hose and (metered) oil gun in order to efficiently and safely transfer clean oil.

This design ensures compliance to Best Practice in lubrication management and contamination control with as result a very clean lubricant (ISO 4406) for use in uour machinery.

In short:

Lubrication Reliability in practice

Stationary version mounted on a heavy duty, 4-wheel mobile trolley. With hose and oil gun to reach machine fill point directly. Digital consumption meter/ hose reel in option. Pistol handle with ½" swivel connector with anti-drip nozzle hook type. Alternatively with ½ " Quick Disconnect coupler (male + female and dust cap & plug)

Technical Data

- **Pump** : Pneumatic oil pistol pump, 3/1
- **Flow** : 30 l/min
- **Drum Trolley** : 4 Wheel – for 208 l drums
- **Filter system** : Hydraulic cartridge filter standard 10μ
- **Outlet** : Hose 4 m with ½ » oil pistol
- **Outlet alternatives** : Hose 4 m with ½ » Quick disconnect, Meter gun
- **Max viscosity standard** : 680 cSt (without hose reel)
- **Optional filters** : 3 μ filter
- **Product code standard** : LU-MEMD10S : pistol & anti-drip nozzle gun
- **Product code option QD** : LU-MEMDS2 : ¾ « quick disconnect
- **Product code option digital meter** : LU-MEMDS3 : oil pistol with digital meter
