

WORK SAFELY ON HEIGHTS

INSTRUCTION MAGNETIC ANCHORING

- 1 day training + exam
- Theory and practical
- Location of STE or your company's location

CORRECT

INCORRECT

Instruction Magnetic Anchoring

During the training you learn to place, check and inspect Magnetic anchors. You learn how to place, use and remove magnetic anchors safely and which tools you need to do so. Working with magnetic anchoring, requires a different work method and this training helps you to learn how to do this correctly and safe.

Admission requirements

You have a valid certificate for Advanced Scaffolder and NO pacemaker.

You learn

- ✓ The relevant safety, legislation, rules and procedures;
- ✓ To use and maintain the right PPE's;
- ✓ To recognize and name shortcomings, dangers/dangerous situations,
- ✓ About (almost) accidents and the procedures to report them;
- ✓ Magnetic anchoring and how they work (magnetics);
- ✓ When (not) to choose for magnetic anchoring;
- ✓ Which equipment is needed for this job and how to use it;
- ✓ How to hand over a standard anchoring pattern within a standard configuration to the client (transfer procedure);
- ✓ About acting forces and (work)load that influence the strength, rigidity, stability and safety;
- ✓ How to check, inspect and report about the magnetic anchoring;
- ✓ To perform an users inspection if requested by the client.

Certificate

After passing your exam you will receive an STE certificate, that's valid for 5 years.
