

WHAT IS MORE IMPORTANT FOR YOUR COMPANY WHEN CHOOSING A NEW TECHNOLOGY/PRODUCT/OR APPLICATION?

Companies recently are more aware of their impact on society, the environment, and the economy. Businesses and governments nowadays are taking actions with the focus on creating a balance between those three elements. However, sometimes one aspect can dominate the other two based on the business type, size, or activities.

PEOPLE VOTED FROM 35 DIFFERENT COMPANIES IN DIFFERENT SECTORS.

What is more important for your company when choosing a new technology/product/or application?

HOW DO WE HELP BUSINESSES ACHIEVE EXCELLENCE IN SUSTAINABILITY?

Traditionally	Customer dilemma	Simple solution
Scaffolds are usually built detached from the counter object because anchoring is always destructive.	reducing the overall costs, guaranteeing people safety, reducing the lead-time, and decreasing the impact on the environment.	Controlock® magnet anchors are non-destructive. And the scaffold obtains the strength and stability from the object to which it is connected.

"When I was contracting, I looked at the products where I could see the benefits of simplifying the process & safety features over cost.
McNetiq scaffold magnet benefits are

- Reduced Labour cost
- Less material
- Reduced Logistics
- Less storage
- Reduced time working at height.

Controlock® magnet is an excellent product in the right hands."

Mark Parkin
Business Development Manager
