Adoption and acceleration Services – CALM and Activate Methodology

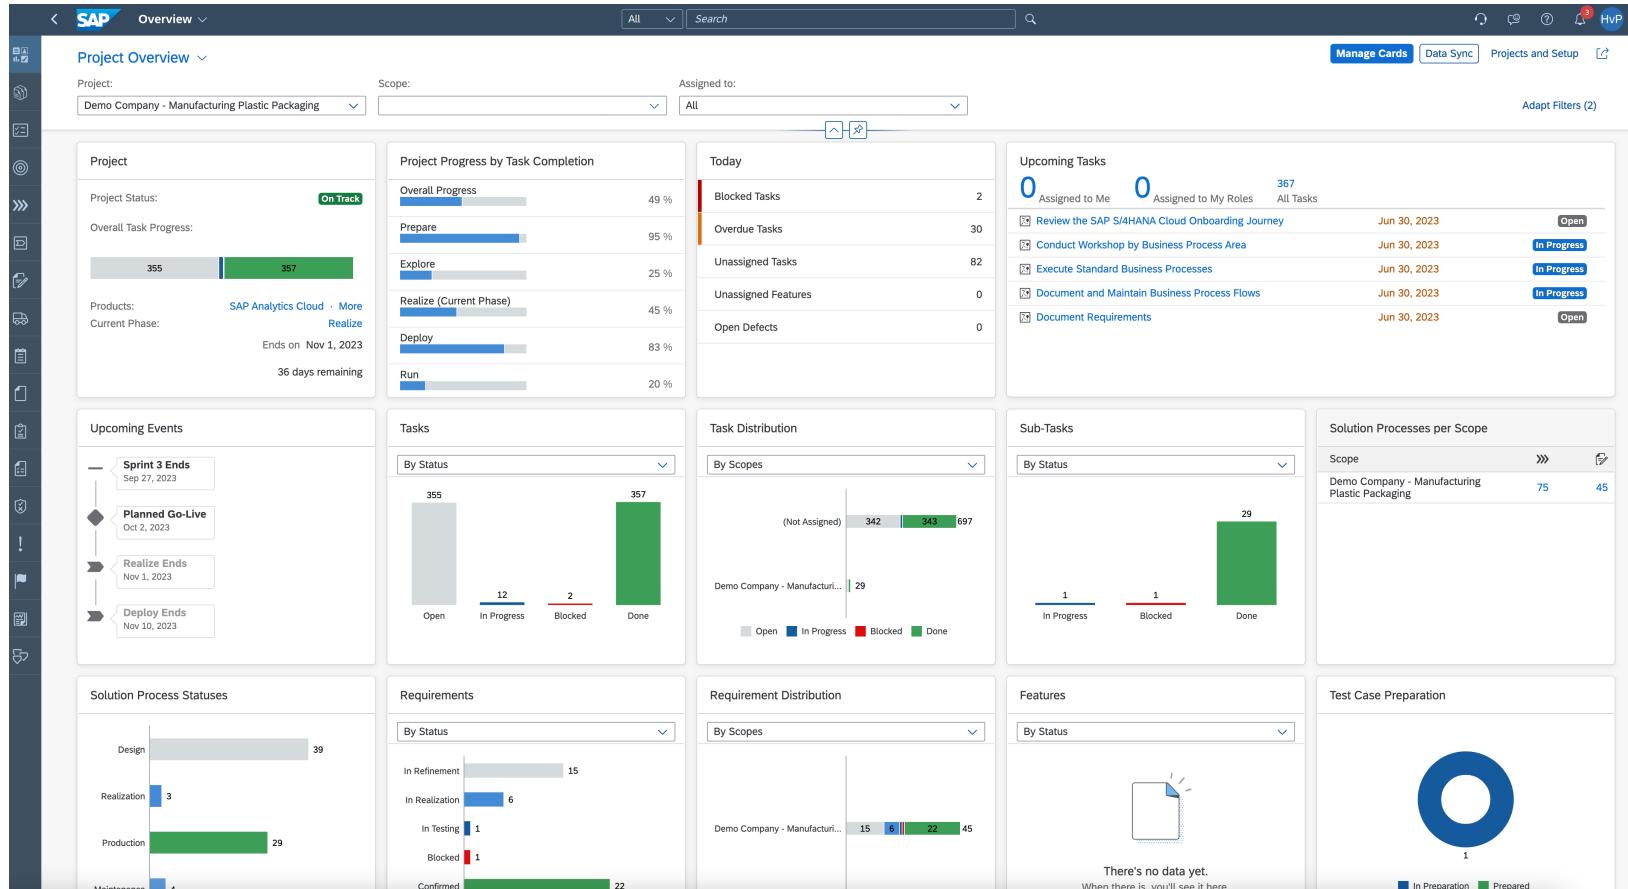

The screenshot shows the SAP Project Overview interface. The top navigation bar includes 'Overview', 'All', 'Search', and 'Manage Cards'. The main area displays 'Project Overview*' with a 'Project' card showing 'Demo Company - Manufacturing Plastic Packaging' is 'On Track'. It also shows 'Overall Task Progress' (95%), 'Products' (SAP S/4HANA Cloud), 'Current Phase' (Realize), and 'Ends on Nov 1, 2023'. The 'Project Progress by Task Completion' section shows tasks like 'Prepare' (95%), 'Explore' (25%), 'Realize (Current Phase)' (45%), and 'Deploy' (83%). The 'Today' section lists 'Blocked Tasks' (2), 'Overdue Tasks' (30), 'Unassigned Tasks' (80), 'Unassigned Features' (0), and 'Open Defects' (0). The bottom section shows a detailed timeline from 'Discover' to 'Run' with various sub-tasks and milestones for each phase, such as 'Cloud Trial' in Discover and 'System Go-Live' in Deploy.

To **implement** and **operate** intelligent cloud and hybrid business solutions

To **guide** the implementation team through the SAP S/4HANA Cloud implementation

Accelerators are linked to the relevant **deliverables** and tasks making them easy to consume

Discovery Assessment to get overview business model(s) to be able to focus on most important processes during explore fase

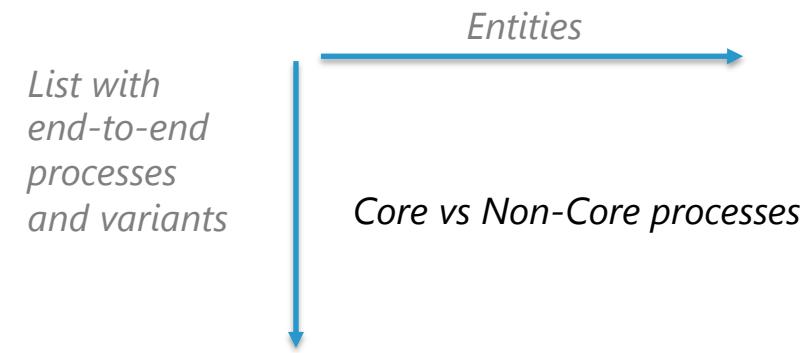

Business Fit Assessment

Discover your current IT and solution landscape and an overview of the expected future business expectations. This high-level overview is used to prepare your business transformation path.

Walk-through Workshops

Analyze the high-level requirements based on your industry and business characteristics to explore the improvement potential. In addition, a first analysis of the data and necessary integrations to define the project's scope.

To get a smooth Journey, project members must embrace Cloud Mindset

Embracing Optimizations & Innovations

Create Joint forces between Business & IT

Deploy Industry Best Practices

Align processes to standards, configure and run

Promote Self-Control

Stay Current: Enjoy the movement

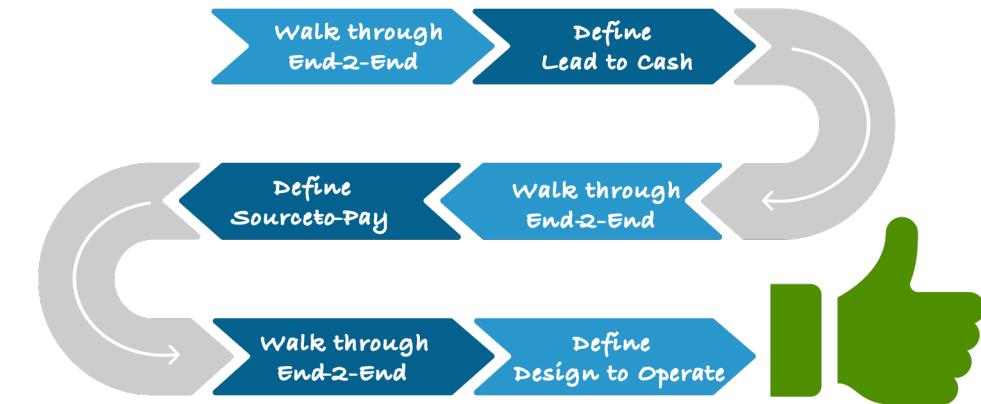

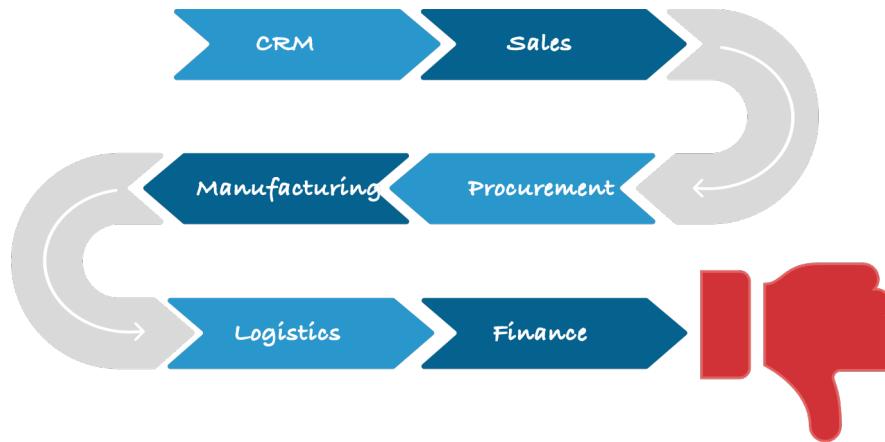

Use Self Services to stay in control

Customers that adhere to these rules realized following benefits:

- Faster time to value
- Lower cost of initial deployment and on-going cost of running the solution
- Ability to absorb innovation delivered by SAP at a faster rate
- Lower risk during the deployment of the solution
- Higher flexibility and lower reliance on one system integrator
- Deployment of future-proof solution utilizing modern technologies

End-to-End process approach to break-down eventual silos

We implement process support and not an application

We have a Manufacturing Package with predefined content and accelerators to be able to go live within 10 - 16 weeks

Manufacturing Package Content

Certificate of Qualification

SAP® Qualified
Partner-Packaged Solution
