

Press Release

1st International Seaweed Conference USA

Seagriculture

7 - 8 SEPTEMBER 2022
PORTLAND (ME), USA

Metal Production with a network of 100+ subcontractors in the Baltic Region aims to help startups in global challenges facing the blue industry.

Seagriculture Conference is going to the USA for the first time together with innovative engineering companies from Europe. Metal Production, Seagriculture's Gold Sponsor at the same time Sponsor of Investing in Seaweed Session, is a contract development and manufacturing organization (CDMO) strong in designing, modeling, and producing non-standard upstream, midstream, downstream equipment for aquafarming, marine, and offshore industries.

Metal Production is a coordinator of the Rocket cluster and has a network of 100+ subcontractors in the Baltic Region. They aim to gather key engineering companies and investors (owners-partners) to help startups with expertise in global challenges facing the blue industry in recruiting water and oceans.

Mechanical engineering at Metal Production UAB focuses both on creating innovative and non-standard systems, as well as on the generation and distribution of sustainable footprint. In both these areas, Metal Production applies common mechanical engineering principles to find the most practical and sustainable design approaches. They design systems and equipment for marine, offshore, seaweed, aquaculture and industrial sectors.

To further escalate the development of the seaweed industry, Metal Production and their partners preparing for a venture capital launch and looking for lead investors, total estimation of the fund - is 18 million Euros. The funding will be dedicated to the global goal - recruiting oceans, waters, and pollutants such as CO₂, phosphate, and nitrates as substrate for cultivating new and unique biomass that can serve feed, food, pharma, medicine, and industry sectors. They plan to invest in 12 start-ups oriented to sustainable hardware and cutting-edge technological solutions for the seaweed industry. They are looking forward to successful corporations.

Today Metal Production UAB and PurSea AS developing the first industrial-grade seaweed freezer in a transportable container and looking for seaweed farmers who are interested in this equipment.

Within Seagriculture USA Conference Program, all the delegates will have opportunity to communicate with Metal Production's team members during Trade Show and multiple coffee breaks.
